## About This Game

Unleash your inner hero in this **16 player PvP VR arena**. Fly and engage in high action aerial battles with energy blasts and charge beams. Grapple across buildings facing off against giant Titans with your two swords, or play as a Titan and crush the tiny humans going after you in this. Motion sick players be warned, this is no bars held, no teleportation, no baby steps.

**This game allows for Asymmetric Co-Op Multiplayer with VR and Keyboard Mouse Players.**

Team Deathmatch / Free For Fall:

In this slayer type game, you are the **Hero of Flight**. Soar through large battle arena, firing Energy Blasts and Energy Beams. Strategic positioning, teamwork, dodging, and pure combat prowess are key. Energy blasts crash against enemy energy blasts.

Titan Battle:

As a **Hero of Humanity**, you are equipped only with a **sword** in each hand and your **grappling gear**. Zip through the city and fight against (other human players) that are hell-bent on squishing you. To kill Titans, stab them with your sword. A strike to the neck will deal massive damage. As a **Titan**, eliminate the humans by hitting the tiny humans with your hands. You have limited movement as a Titan as well.

Red Bar: Health

Blue Bar: Stamina

---

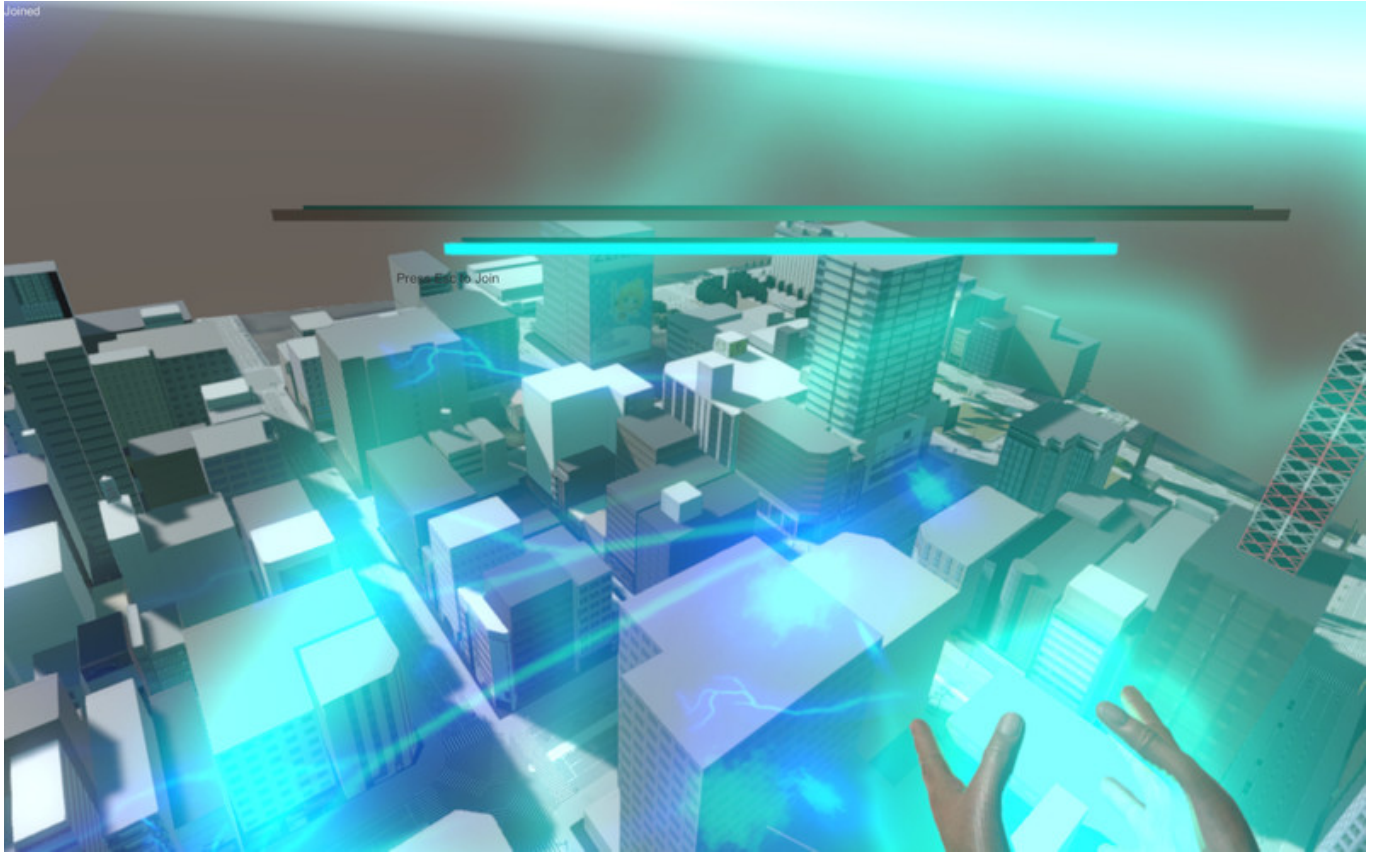

**Graphics:** GTX 970 or equivalent

English

---

Titan mode is similar to attack on Titian. This could be an epic multiplayer game... needs more people or AI titans. While unrefined the game itself shows a lot of promise, the titan mode in particular. It just needs more players
